

More than a reliable, stable and feature-rich EFIS system. Chelton is intuitive—reducing the typical learning curve and increasing your ability to master a new system.

Installation simplified for the RV-10.

To make installation surprisingly easy, the SV-10 comes complete with an integrated wire harness engineered and fitted specifically for the RV-10. It combines over 130 electrical connections! It's not just a harness for your Chelton EFIS; it includes wiring from wingtip to wingtip and firewall to rudder. This harness, built to exacting standards, is supplied by an aerospace company who also manufactures harnesses for the F-22, F-16, Airbus, Boeing, and others. Included in your harness are connections for your Chelton EFIS and the new Pinpoint Inertial GADAHRS.

Wiring is also provided for interfaces such as the Trutrak Autopilot—with pitch and roll servos, Garmin SL-30 Nav/Com, datalink, and PS Engineering audio panel. We've even included wiring for aircraft systems such as electric pitch and roll trim, control stick functions, outside air temperature probe, nav and strobe lights, landing light, pitot heat and door ajar sensors.

Following the detailed SV-10 manual for installing your aircraft harness system is easy—it's designed for those with basic wiring skills. In your manual you'll find photographs depicting an installation of the SV-10 harness in an RV-10. Test your wiring, install your harness and components, and give it power. The aircraft harness is designed to eliminate the majority of complicated wiring for your RV-10, so we've included it with the Chelton SV-10 system to simplify your installation, saving you as much time as possible and getting you and your RV-10 in the air faster!

Our integrated System harness is custom fitted to your RV-10 and goes right in.

The Chelton EFIS SV-10

With this special package you receive the following components:

- Two screens 5.575" h, 7.91" w, 2.95" d
- Pinpoint Inertial GADAHRS
- Comant GPS antenna
- SmartMedia Card
- Operation Handbook and Installation Manual
- Training system operation and CAWS system DVD
- Complete system wire harness designed and fitted to the RV-10
